

AutoFocus

- Sharp lines at different projection distances (2'-25'+)
- Data-controlled **AutoFocus** eliminates manual adjustments
- One projector able to provide the functionality of different projectors
- One projector available for use in many applications

AutoAim

- Data-controlled **AutoAim** allows operators to work in many zones without having to stop to reset the projector
- Data-controlled **AutoAim** multiplies projector's useful field, allowing one projector to do the work of multiple projector setups
- Benefits of laser projection available in confined areas which otherwise would require multiple projector setups
- 60⁰ projection cone automatically repositioned throughout 90% of sphere
- Full Multitasking benefits (independent operators working simultaneously) available in all aimed fields
